ABOUT ME

I am a passionate 3rd-year Computer Engineering student with a strong interest in Full-Stack Development, Backend Engineering, and Problem Solving. I am currently developing backend applications using Java and Spring Boot, building responsive user interfaces with React, and strengthening my Data Structures and Algorithms skills using C++. I enjoy creating real-world projects that solve practical problems and continuously explore new technologies, including AI and Prompt Engineering. My goal is to become a skilled software engineer by combining strong technical knowledge with hands-on project experience.

EDUCATION

2024-2027
Gujarat Technological
University

**Bachelor of science in information
and technology**

EXPERIENCE

Currently pursuing B.Sc. IT and actively developing skills in Java, Spring Boot, React, and C++. Working on personal and academic projects to gain hands-on experience in full-stack development, backend systems, and data structures & algorithms. Passionate about learning new technologies and building real-world software solutions.

SKILLS

- DSA with c++
- C Language
- Spring boot
- OOP
- React.js
- Java
- Github
